Coroner—Dr. A. B. Riley

FISCAL COURT.
Meets Tuesday after first Monday in January, April and October.
1st Magisterial District—Ed Shown, Hartford, Route 7.
2d Magisterial District—Winson Smith, Select.
3d Magisterial District—W. S. Dean, Dundee.
4th Magisterial District—S. W. Leach, Beaver Dam, Route 3.
5th Magisterial District—S. L. Fulkerson, Rockport.
6th Magisterial District—R. C. Tichenor, Centertown.
7th Magisterial District—B. F. Rice, Fordsville.
8th Magisterial District—Ben W. Taylor, Hartford, Route 7.

CARDS OF HUMAN SKIN.

One rainy Sunday afternoon, back in the mists of the seventeenth century, an Apache chieftain got trimmed in the redskin equivalent of a poker game. To change his luck, he conceived the idea of killing a particular enemy of his, skinning the dead Indian, tanning his hide and then going back into the game with the cards made therefrom. This rather drastic method of tempting fickle Fortune would probably remain a dead secret of the past had not the University Museum, last week, acquired a collection of Apache ethnological specimens, which include a deck of playing cards made of human skin.

These cards are curiously copied from the old Spanish playing cards designed in the seventeenth century. The Apaches used them for gambling purposes. The figures representing kings, queens and jacks are original, and the markings of the smaller cards are also unique; but the modern game of poker can easily be played with the human-hide deck when once the players understand the Apache markings.—[Philadelphia Record.]

ly be played with the human-hide deck when once the players understand the Apache markings.—[Philadelphia Record.]

DIAMONDS FOR AUTOS.

Enough diamonds are sacrificed each year in the average automobile factory to fit up a dozen King's crowns! Quantity production of automobiles requires that every one of the thousands of parts turned out by machinery must measure up to a high standard.

Only then will the parts of the assembled automobile work together smoothly. The emery wheels, used for rapid finishing, must be "true" up with corresponding accuracy. Nothing less hard than the diamond can be depended upon for this "trueing."—[Popular Science Monthly.]

NEW GREENBACK.

A new issue of \$1 and \$2 greenbacks, discontinued more than thirty years ago, was put into circulation about February 1, displacing United States notes of larger denomination to provide relief from the unprecedented demand for small paper money. The Treasury Department announced last week that the issue had been decided on because silver certificates, the ordinary bills of \$1 and \$2 denominations, could not be issued under the law in sufficient quantity to meet the demand.

APPRECIATES HERALD.

Owensboro, Ky.—Editor Hartford Herald, Hartford, Ky.: Dear Sir:—Please find enclosed money order for \$2.00, for which I desire to renew my subscription to The Herald for another year, and also to pay for the year's subscription that has just past.

With best wishes for The Herald and assuring you that I appreciate every issue of it, I am

Very respectfully,

(Mrs.) ELVIRA MILLER.

R. F. D. No. 7.

Narrows, Ky.—Editor Herald, Dear Sir:—Please find \$1 for payment of another year's subscription to The Herald.

Yours,

R. L. SHULTZ.

Drakesboro, Ky.—Gents:—Find \$2.00 on my subscription.

Yours,

R. L. CANAN.

What has become of the old-fashioned schoolboy who carried his lunch in a gallon basket and ate his slate pencils?

GROWTH OF THE BODY.

It Comes in Alternate Periods of Filling and Stretching.

That men and women grow in height and weight from birth until maturity, if they live the ordinary term of years, and that, as a rule, men are taller than women are facts of common knowledge. How this growth is accomplished is not so generally known, nor is it commonly understood that the difference in length of the male and female of the species is apparent even at birth. Carefully kept records show that the average boy baby is about two-fifths of an inch longer at birth than is the average baby girl.

Another curious feature of this growth discovered by patient research is the fact that it is not a gradual and regular increase. There are periods in which the youthful body expands rapidly in length, while it seems to become thin and lean.

Then comes a time where there is little increase in height, but the body becomes plump. While there is a slight difference of opinion as to the exact number of years and ages when these alternate growths are in evidence, the general proposition is conceded by the most thorough of the investigators.

Professor Stratz tabulates this growth of the body as follows: Period of the first fullness of body, two to five years; period of first stretching, six to eight years; period of second fullness, nine to eleven years; period of second stretching, twelve to sixteen years; period of maturing, seventeen to twenty-five years.

Professor Weissenberg, however, divides the time of growth somewhat differently and makes allowance for a difference between the periods of change in girls and boys.

His tabulation is as follows: Period of first fullness, two to four years; period of first stretching, five to six years; period of retarded growth, boys eight to twelve years, girls eight to ten years; period of second stretching, boys thirteen to eighteen years, girls eleven to fifteen years; periods of retarded growth, boys nineteen to twenty-six years, girls sixteen to nineteen years; period of standing still and of the second fullness, twenty-six to twenty-nine to fifty-one years; period of decline, fifty-two to seventy-six years.

Among other interesting features of this growth, it is noted that the changes are not constant within the limits of a year, but appear to depend upon the season.

It has been found that increases in height and girth of chest are greater in summer than in winter. It would seem that the greatest gains in weight are made from August to January, the weight remaining almost constant from February to May.

Of course there are many special causes which in individual cases make exceptions to these rules, but under normal conditions this is the way our bodies grow from babyhood to maturity.—New York American.

\$500 IMBEDDED IN CORPSE.

Examination of the body of Mrs. Theresa Veto, 52 years old, at the morgue today revealed that \$500, which was missing after she had been run over by a trolley car, was imbedded in a deep wound in her side. The money was found by Keeper Winkel, of the morgue, and turned over to Coroner Knight.

The body was taken to the morgue yesterday from the woman's home, where it had been searched and only \$53 found. Relatives knew that she carried more than \$500, and believed she had been murdered and robbed.—[Philadelphia Cor., New York Herald.]

Study of Beet Roots.

Ten years' patient watching and study indicate that difference in size, total sugar content and percentage of sugar of beet roots furnish no evidence of inheritance and that there is no correlation between percentage or quantity of sugar of roots of ordinary sizes and their yield of seed, nor between their yield of seed and percentage of sugar in progeny. The conclusion reached is that the fluctuation in the percentage and yield of sugar may be now regarded as due to soil conditions, both as to natural formations and cultivation of fertilizer methods practiced.

Dairy Farming Profitable.

Dairying is an economical form of agriculture, and economy and thrift are handmaidens of prosperity. It remains upon the farm the larger portion of the fertility of the crop and thus the productiveness of the fields is kept up without recourse to expensive commercial fertilizers. Dairy farms are invariably highly productive because the fertility is returned and because a plentiful supply of humus is supplied to the soil. Dairy farming is economical in that it utilizes practically all the land. Parts that are unsuited to the plow can in nearly all cases be turned to pasture.

Corn For Poultry.

Do not supply too much corn to laying hens. It is very heating, and it is too fattening for hens that are to make eggs. It is a good winter feed, but too much fat stored in a hen's body interferes with the laying functions.

Green Feed For Hens.

Hens need some green food in winter if they are to lay well. Mangels, carrots and cabbage are good. Hang them up so that the hens can just reach them nicely. Sprouted oats are also good. Alfalfa and clover leaves can be soaked up and fed to good advantage.

Tree Planting.

Trees should not be shipped during the winter, as there is danger of freezing, but if there is a nursery near you trees may be bought and planted any time during the winter that the ground is dry enough. Fall or spring is best.

HOUSEWIVES, GET THIS!

SOME HIGH COST TIPS

New York.—The Department of Health issued another bulletin to housewives containing suggestions for reducing the cost of living. The statement follows:

"Three heaping tablespoons of macaroni baked with cheese contains as many food units as one half a pound of lean roast beef.

"Three heaping tablespoons of baked beans contain the same number of food units as two and one-half ounces of roast lamb.

"One half pint of split pea soup contains more food units than six ounces of hamburger steak. One pint of bean soup contains more food units than a quarter of a pound of roast chicken.

"A quarter of a pound of boiled codfish contains twice as much protein as the same amount of beef stew and more than three ounces of boiled ham and four ounces of chicken fricassee.

"Two heaping tablespoons of boiled rice contains as many food units as two and one half boiled eggs.

"Cabbage, which is particularly high in price at present, contains very little nourishment. It requires a whole cabbage to provide the same number of food units as one slice of whole wheat bread.

"A cup of cocoa contains 30 times as many heat units and 15 times as much protein as three heaping tablespoons of boiled cabbage.

"Three heaping tablespoons of granulated sugar contains as many fuel units as two lamb chops from which the fat has been eliminated.

"Two cubic inches of American cheese contains more nourishment than a quarter of a pound of beef stew."

Sloan's Liniment For Rheumatism.

The torture of rheumatism, the pains and aches that make life unbearable are relieved by Sloan's Liniment, a clean clear liquid that is easy to apply and more effective than mussy plasters or ointments because it penetrates quickly without rubbing. For the many pains and aches following exposure, strains, sprains and muscle soreness, Sloan's Liniment is promptly effective. Always have a bottle handy for gout, lumbago, toothache, backache, stiff neck and all external pains. At druggists, 25c.

Advertisement.

Remember young man, that you can't tell by the rings on a girl's fingers how her hands will look with biscuit dough on them.

Old Man Grouch often goes visiting on bad winter days. He says that when he stays at home his wife insists that he spend most of the time carrying in wood and fixing fires. When he's away she has it to do, and he has some peace.—[Southern Agriculturist.]

As a general thing, it is the men who feel most at home in a saloon who pay the bartender's house rent.

HERE'S PROOF.

A Hartford Citizen Tells Of His Experience.

You have a right to doubt statements of people living far away but can you doubt Hartford endorsement?

Read It:
Lorenza Acton, Pike St., Hartford, says: "I have suffered with backache and pains across my kidneys, and have found that Doan's Kidney Pills regulate my kidneys and help my back whenever I get this way. I consider Doan's Kidney Pills a reliable kidney medicine."

Price 50c at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Acton had. Foster-McBurn Co., Props., Buffalo, N. Y. Advertisement.

THE THRICE-A-WEEK EDITION OF THE NEW YORK WORLD.

Practically a daily at the price of a weekly. No other newspaper in the world gives so much at so low a price.

The value and need of a newspaper in the household was never greater than at the present time. The great war in Europe is now half-way into its third year, and whether peace be at hand or yet be far off, it and the events to follow it are sure to be of absorbing interest for many months to come.

These are world-shaking affairs, in which the United States, willing or unwilling, is compelled to take a part. No intelligent person can ignore such issues.

The Thrice-A-Week World's regular subscription price is only \$1.00 per year, and this pays for 156 papers. We offer this unequalled newspaper and The Hartford Herald together for one year \$1.65.

The regular subscription price of the two papers is \$2.00.
